## **Canadian Angus Association to Build an Office Building**

**October 13, 2011: for immediate release**

**CALGARY, AB** — The Canadian Angus Association Board of Directors has purchased land in East Balzac, Alberta, and will build an office building on it. The Canadian Angus Association office, currently located in Calgary, will relocate to the new building upon completion. The Association has been leasing office space in Calgary since 1996.

Construction is expected to be rapid with move-in anticipated in the first half of 2013. The building will be located in the Wagon Wheel Park just east of Cross Iron Mills shopping centre. The site offers ideal accessibility and is conveniently located near the Calgary International Airport.

Although built and operated by the Canadian Angus Association, other Canadian breed associations and industry groups have expressed an interest in joining this project.

President David Bolduc calls the decision to purchase land and build an office building “one of the most significant decisions in the history of the Angus breed.” He continues, “We have looked at options to own our own building for several years and feel that this is the best investment of our Association’s resources on behalf of our membership. We are very excited about this tremendous opportunity and look forward to relocating with other Canadian beef breed organizations and industry groups.”

The Canadian Angus Association ([www.cdnangus.ca](http://www.cdnangus.ca)) is a not-for-profit association incorporated under the Animal Pedigree Act. The Association represents members across Canada for the purposes of registering and recording the pedigrees of purebred Angus cattle and promoting the breed across Canada. Its member-approved mandate is to maintain breed registry, breed purity and provide services that enhance the growth and position of the Angus breed.
