

WELCOME!

We are delighted to welcome you to the Canadian Angus Association, Canada's largest beef breed organization. Whether you've recently purchased an Angus animal or had one transferred to your name, you are now part of a thriving community committed to quality, sustainability, and innovation in the cattle industry.

COMMERCIAL MEMBERSHIP VALUE

The Canadian Angus Association has everything our members need to get their work done with efficiency. We foster relationships with industry partners to help define and grow the breed.

We're here to support you!

If you need assistance with your Angus animal or would like to become more involved in our association, please don't hesitate to contact us at 1-888-571-3580 or verifiedangus@cdnangus.ca.

ASK FOR THE TRANSFER!

As soon as your transfer is complete you gain access to all of the programs that the Canadian Angus Association has to offer!

MAXIMIZE THE VALUE OF YOUR ANGUS INVESTMENT

The Canadian Angus Green Tag Program is designed to help you market your Angus cattle with confidence. Our RFID tags visually and electronically identify cattle with at least 50% Angus genetics, ensuring eligibility for premium Angus beef programs across Canada.

CANADIAN ANGUS RFID TAGS – THE GREEN TAG ADVANTAGE

Why Choose Canadian Angus RFID Tags?

- High demand by Canadian Angus beef programs—sell direct or through 160+ Angus feeder sales across Canada.
- Official Canadian Cattle Identification Agency (CCIA) compliant tag—no additional tags needed for national ID.
- Expand marketing opportunities with eligibility for branded Angus beef programs.

How to Order:

Order Canadian Angus RFID Tags through the
Canadian Cattle Identification Agency (CCIA):
Call 1-877-909-2333 | Visit www.canadaid.ca

VERIFIED ANGUS

The Canadian Angus Association's Verified Angus program provides third-party verification for cattle that are a minimum of 50% Angus genetics, providing access to genetics-based branded Angus beef programs and marketing opportunities for Canadian Angus genetics. The Verified Angus program is an extension of the Canadian Angus tag program and aims to provide verification of Angus genetics regardless of the RFID tag used.

Producers enrolled in the Verified Angus program will have access to Association verification of genetics and recognition of Best Management Practices including vaccination protocols. Label verification is increasingly becoming necessary for market access and added market value.

Producers who raise Angus and Angus-influence cattle can qualify for the Verified Angus program by meeting the following requirements:

- Purchase Canadian Angus RFID tags through CCIA for automatic enrollment OR enroll in the Verified Angus Program through the Canadian Angus Association
- Animals must have a minimum of 50% Angus genetics; thus at least one of the parents must be registered in the CAA herdbook
- Registered animals must be transferred to your ownership for verification

To receive additional verification recognition for Best Management Practices including vaccination protocol, complete the Verified Angus Program enrollment form.

DOWNLOAD YOUR OWN CALVING BOOK APP TODAY!

CALVING BOOK APP

The easy, electronic option
to record your calves on the
go from the Canadian Angus
Association

KEY FEATURES

- Extract calving information any time
- Simple, easy-to-use interface with the same fields as the paper calving book
- Free to Canadian Angus producers through the app store
- Create individual calf records or work from preloaded female inventory
- Entire farm team can access and update calving information

You can
Register Here:

ANGUS WORKS

THE ULTIMATE ON-FARM MANAGEMENT SOLUTION

Introducing AngusWORKS, an advanced herd management software powered by TELUS Agriculture. Designed for both commercial producers and Canadian Angus Members, AngusWORKS simplifies livestock management while optimizing productivity.

KEY FEATURES

Record everything you need for registration and performance purposes and so much more:

- pasture groups • health records
- movement • sale information
- calves on the fly

Integrate your readers and record RFID and TSU/hair card bar codes easily

Multiple sire exposures, the app will prompt the right sire based on exposure data

Submit multiple DNA test requests with a few clicks

Create custom animal lists
(e.g. pull a list of all your retained heifers to move or create exposure group lists)

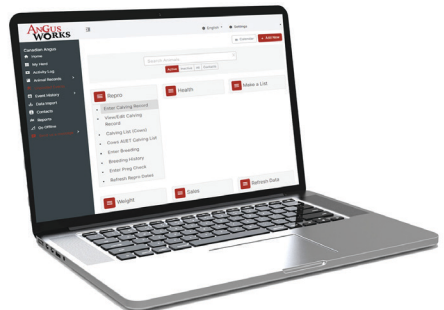

Create custom animal alerts
(e.g. collect a DNA sample on cow 123Y next time you process her)

Customize your screen with fields that are important to you

Submit your registrations, weights and transfers to CAA quickly and easily

CURIOUS ABOUT GEPDS?

Genetic selection tools, such as genomically enhanced EPDs (GEPDs), help producers achieve faster genetic progress. Research by the Canadian Angus Association confirms that breeding values from the World Angus Evaluation (WAE) accurately predict calf performance in commercial herds. The Association publishes GEPDs for key economic traits, including growth, maternal production, and carcass quality traits. To simplify selection, the CAA also offers the Canadian Balanced Index (CBI), which combines GEPDs from all traits and weights them based on their economic impact to commercial producers.

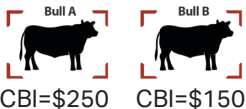

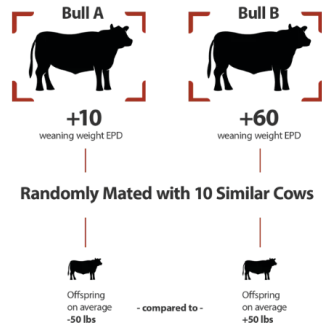

Example of EPD Use

To use EPDs effectively you must understand how they work.

Imagine you are interested in purchasing a couple of bulls for your herd.

You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight EPD of +10 and Bull B has a weaning weight of +60. What does that mean? How can you use the EPDs to choose between the two bulls?

If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50).

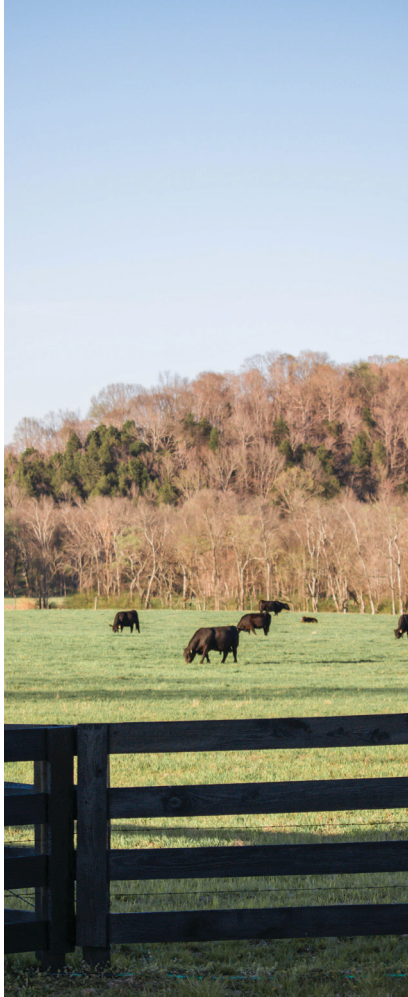

On Average, progeny from Bull A will be \$100 more profitable in a Canadian commercial operation than the progeny from Bull B.

Expected Progeny Differences (EPDs) are the most powerful genetic tool we have for selecting the best animals for your breeding program.

Learn how GEPDs can benefit your herd
